

INFORMATION	QUESTIONS	% (n) OF SUBJECTS	
Professional information	Medical Doctor	26.13% (190)	
	Nurse	29.16% (212)	
	Obstetrician	7.29% (53)	
	Healthcare operator	9.49% (69)	
	Administration staff	8.80% (64)	
	Laboratory technician	2.20% (16)	
	Radiology technician	1.24% (9)	
	Others	15.68% (114)	
Professional risk in the last three months	Performance of invasive maneuvers (e.g. aerosol / bronchoalveolar lavage / intubation)	18.29% (133)	
	Performance of Covid19 swabs on a patient	8.39% (61)	
Epidemiological risk	Unknown contacts with positive/suspect Covid-19	76.75% (558)	
	Contact with symptomatic/positive Covid-19	10.87% (79)	
	Contact with symptomatic/negative Covid-19	3.16% (23)	
	Contact with asymptomatic/positive Covid-19	5.78% (42)	
	Contact with symptomatic/suspect without Covid-19 confirmation	3.44% (25)	
Personal medical history	Chronic conditions	36.04% (262)	
	Chronic drugs	33.43% (243)	
	Flu vaccine (2019-2020)	34.94% (254)	
	In the last three months (α)	Temperature $>37.5^{\circ}\text{C}$	α 17.47% (127) β 0.14% (1)
		Cough	α 34.11% (248) β 7.84% (57)
	Dyspnea		α 7.02% (51) β 2.48% (18)
	Muscular pain	α 23.80% (173) β 6.60% (48)	
		Conjunctivitis	α 9.22% (67) β 3.03% (22)
	Diarrhea	α 17.33% (126) β 2.06% (15)	
		Tiredness	α 29.02% (211) β 10.32% (75)
	Respiratory symptoms	α 13.76% (100) β 2.06% (15)	
		Cold	α 46.63% (339)

		β 10.32% (75)
	Nasal stuffiness	α 39.61% (288) β 17.47% (127)
	Pneumonia	α 1.38% (10) β 0% (0)
	Anosmia	α 4.26% (31) β 1.79% (13)
	Dysgeusia	α 3.85% (28) β 0.96% (7)
	Nausea	α 12.52% (91) β 2.34% (17)
	Inappetence	α 8.12% (59) β 0.69% (5)
	Headache	α 40.99% (298) β 15.96% (116)
	Any acute illness in the last two weeks	3.85% (28)

Supplementary Table 2: Medical history and health status questionnaire. The first column (QUESTIONS) indicates the healthcare workers categories and the questions asked; the second column (% (N) OF SUBJECTS) reports the prevalence for each of the considered variables
