

Appendix 1. Description of variables.

Demographic and epidemiological data	Chronic bronchitis
Date of birth	Asthma
Admission date	Transient ischemic attack
Age (years)	Hemiplegia or paraplegia
Gender	Dementia
Healthcare worker?	Peripheral arterial disease
Close contact with known case	Chronic liver disease
Nosocomial, nursing home, or community acquisition	Chronic kidney disease
Date of symptoms onset	Malignancy (solid, leukemia, lymphoma)
Date of SARS-CoV-2 PCR testing	Diabetes with or without target organ damage
SARS-CoV-2 PCR test specimen (pharyngeal exudate, sputum, bronchoalveolar lavage)	Connective tissue disease
Alcohol use disorder	Gastric and/or duodenal ulcer
Tobacco use	AIDS
Degree of dependency	Known HIV infection
Comorbidity	Obstructive sleep apnea-hypopnea syndrome
Hypertension	Charlson comorbidity index score
Dyslipidemia	Habitual treatment
Atrial fibrillation	Metformin
Anxiety disorder	DPP-4 inhibitors
Depression	GLP-1RA
Obesity	SGLT2 inhibitors
Neurodegenerative disease	Insulin
Organ transplant	Inhaled corticosteroids
Myocardial infarction	ACE inhibitors
Angina pectoris	Angiotensin-renin blockers
Heart failure	Aspirin
Chronic obstructive pulmonary disease	Anticoagulants
	Biological therapies

Hydroxychloroquine

Immunosuppressors

Symptoms and physical findings at admission

Cough

Myalgia

Ageusia

Anosmia

Fatigue

Anorexia

Sore throat

Headache

Fever

Shortness of breath

Diarrhea

Vomiting

Abdominal pain

Tachypnea

Systolic and diastolic blood pressure

Heart rate

Pulmonary auscultation findings

Laboratory test and diagnostic imaging test findings at admission and at 7 days after admission (or at discharge or at ICU admission)

Oxygen saturation (pulse-oximetry) and FiO₂

Complete blood count

Hemoglobin

White blood cell total count

White blood cell differential count

Platelet total count

Biochemical panel

Lactate dehydrogenase

Aspartate aminotransferase

Alanine aminotransferase

Sodium

Potassium

Basal blood glucose level

Ferritin

Venous lactate

Troponin I

Troponin T

Interleukin-6

Prothrombin time and ratio

Activated partial thromboplastin time

D-dimer

Procalcitonin

Blood gases

pH

PO₂

PCO₂

PO₂/FIO₂

Diagnostic imaging tests

Chest x-ray results

Chest CT scan results

Point-of-care lung ultrasound

Microbiological tests

Influenza PCR test

Legionella and pneumococcal urinary antigen tests

HIV antibody screening

Treatment during hospitalization (start and end date and doses, when required)

Lopinavir/ritonavir

Interferon beta-1B
Remdesivir
Hydroxychloroquine
Chloroquine
Tocilizumab
Baricitinib
Systemic corticosteroids
Beta-lactam antibiotics
Macrolide antibiotics
Quinolone antibiotics
Oseltamivir
Inhaled beclomethasone
ACE inhibitors
Angiotensin-renin blockers
Oral anticoagulants
Low-molecular-weight heparin
Aspirin
Non-steroidal anti-inflammatory drugs
Ventilation therapy
Prone position
Non-invasive mechanical ventilation
Invasive mechanical ventilation
High flow nasal cannula

Complications

Bacterial pneumonia
Acute respiratory distress syndrome
Heart failure
Cardiac arrhythmia
Myocardial infarction
Myocarditis
Seizures
Stroke
Shock
Acute kidney injury
Sepsis
Disseminated intravascular coagulation
Venous thromboembolism
Multiple organ dysfunction syndrome
Acute peripheral artery disease

Data on outcomes

Intensive care unit admission
Cause and date of discharge
Readmission
Cause and date of discharge after readmission
Death and date of death
