

Supplementary Figure 1 | Gating strategy for flow cytometry analysis of data shown in Figure 4.

Flow cytometry gating strategy for identification of IFN γ , IL-2 and IL-4 secreting T cells in study subject PBMC samples. **a**, CD4⁺ and CD8⁺ T cells were gated within single, viable lymphocytes. **b**, **c**, Gating of IFN γ , IL-2 and IL-4 in CD4⁺ T cells (**b**), and IFN γ and IL-2 in CD8⁺ T cells (**c**).
