## Supplemental Table 1: COVID-NET and BRFSS Definitions of Underlying Medical Conditions

| Underlying medical condition | COVID-NET <br> (medical chart abstraction) | BRFSS (self-report) <br> Has a doctor, nurse, or other health professional ever told you that you had any of the <br> following? |
| :--- | :--- | :--- |
| Hypertension | Hypertension | Yes to ever told you have high blood pressure and are currently taking medication for <br> high blood pressure (2017 BRFSS) |
| Coronary Artery Disease | History of myocardial infarction, coronary <br> artery disease, coronary artery bypass <br> graphing | Yes to ever told you had a heart attack also called myocardial infarction? Or Yes to <br> ever told you had angina or coronary heart disease? |
| Stroke | Stroke | Yes to ever told you had a stroke |
| Diabetes | Diabetes | Yes to ever told you have diabetes? |
| Obesity | BMI $\geq 30 \mathrm{~kg} / \mathrm{m}^{2} ;$ denominator is everyone in <br> sample | Obesity defined as BMI $\geq 30 \mathrm{~kg} / \mathrm{m}^{2}$ based on self-reported height and weight. |
| Severe Obesity | BMI $\geq 40 \mathrm{~kg} / \mathrm{m}^{2} ;$ denominator is everyone in <br> sample | Severe obesity defined as BMI $\geq 40 \mathrm{~kg} / \mathrm{m} 2$ based on self-reported height and weight. |
| Chronic Kidney Disease | Chronic Kidney Disease | Yes to ever told kidney disease |
| Asthma | Asthma | Yes to do you still have asthma |
| Chronic obstructive pulmonary <br> disease (COPD) | COPD | Yes ever told you have COPD, emphysema, or chronic bronchitis <br> Any condition |
| Pumber of conditions | Sum of any of the above underlying medical <br> medical condition except for hypertension <br> condition except for hypertension; categorized <br> $(0,1,2,3+)$ | Presence of any of the above underlying medical condition except for hypertension <br> (because hypertension not available in 2018 BRFSS data) |
| (because hypertension not available in 2018 BRFSS data); categorized (0,1,2,3+) |  |  |

*Model for number of conditions (variable) is adjusted for age, sex, and race/ethnicity
$\dagger$ Reference group is no underlying medical condition; Number of conditions is a sum of underlying medical conditions excluding hypertension; the most recent year of available BRFSS data for hypertension was 2017.
$\ddagger$ Reference group is $18-44$ years
§Reference group is female
$\|$ Reference group is non-Hispanic white
