

Supplementary material A: Variable definitions

Age

Age at time of surgery, in years

Height

In metres, to calculate BMI

Weight

In kg, to calculate BMI

Gender

Male;

Female;

Not specified

Operation Type description

Elective;

Emergency;

Not specified

Bilateral status

Unilateral;

Simultaneous;

Sequential

Diagnosis

Primary diagnosis related to procedure

Osteoarthritis;

Rheumatoid Arthritis;

Psoriatic Arthritis;

Septic Arthritis

Surgery type

primary;

revision

Surgery Side

Left;

Right

Joint

Knee;

Hip

Haemoglobin

g/L

(Recoded to Anaemia yes/no using threshold of <120g/L for females, or <130g/L for males)

ASA score

1;
2;
3;
4

Use of walking aids

Use of aids on a routine basis for walking

Yes; No

Preoperative gait distance

Distance patient can walk unassisted in metres

Caregiver assistance at home

Lives alone no support;

Lives with spouse only;

Lives with family;

Lives alone with supporting family nearby

Other

Preoperative METs

≥4

<4

Opioid use

Name and dosage; or No

(Converted to binary yes/no)

Neuropathic pain meds

Pt has prescription at time of surgery

Yes; No

Simple Analgesics

Yes; No

Date of surgery

Separated 'In OR At' variable from dd mmm yyyy HH:MM:ss AM/PM' into 'Date of surgery' and 'Time of surgery (in)'

Converted the date component to dd-mmm-yyyy

Time of surgery (out)

Separated 'Out OR At' variable from dd mmm yyyy HH:MM:ss AM/PM and converted the time component into HH:MM:ss 24 hour time

Date of discharge

Separated 'Discharge DateTime' variable from dd mmm yyyy HH:MM:ss AM/PM' into 'Date of discharge' and 'Time of discharge'

Converted the date component into dd-mmm-yyyy

Time of discharge

Converted from HH:MM:ss AM/PM into HH:MM:ss 24hour time.

Length of Stay

Date and time of surgery to date and time of discharge (in days)

Discharge destination

Home;

Home with community support;

Inpatient rehab;

Slow stream rehab;

Aged care

Comorbidities:**Cardiovascular**

Yes; No

Common inclusions: Hypertension; dysrhythmia; valvular disease; congestive heart failure; decreased left ventricular function; peripheral vascular disease; ischaemic heart disease; previous MI; stable angina; unstable angina; stent; coronary artery bypass grafting

Cardiovascular (specify)

Each cardiovascular comorbidity listed, semicolon delimited for calculation of 'number of cardiovascular comorbidities'

Respiratory

Yes; No

Common inclusions: recurrent pneumonia; URI; COPD; Asthma; sleep apnea; shortness of breath (on exertion or otherwise)

Diabetes

Yes; No

Endocrine (other than diabetes)

Yes; No

Common inclusions: Thyroid disease; recent corticosteroid use; hypercholesterolemia; dyslipidemia

Previous stroke/TIA

Yes; No

Neurologic (other than stroke/TIA)

Yes; No

Common inclusions: Seizure disorder; neuropathy/myopathy; neoplasm; increased ICP; Alzheimer's; Parkinsons

Renal

Yes; No

Common inclusions: Renal insufficiency; renal failure; hemodialysis; shunt/fistula; peritoneal dialysis

Hepatic

Yes; No

Common inclusions: Cirrhosis; NAFLD

Gastrointestinal

Yes; No

Common inclusions: GERD; Dysphagia

Bleeding disorders

Yes; No

Hematologic- other

Yes; No

Common inclusions: Thromboembolic disease; previous DVT/PE

Musculoskeletal (other than index pathology)

Yes; No

Common inclusions: Back pain diagnosis; chronic pain; fibromyalgia; ankylosing spondylitis; spina bifida

Psychiatric

Yes; No

Common inclusions: depression; anxiety; chronic opiate use; ETOH abuse; illicit drug abuse

Others

Specified

Includes HIV; Hep B; Hep C etc. Also include smoking status if listed.
