

Supplementary table B: Adaptation of models and tools for validation against the current dataset

Variables	Model 1 [winemaker]	Tool 1 [RAPT; oldmeadow]	Model 2 [oldmeadow]	Tool 2 [gabriel]	Model 3 [gabriel]
Model/tool structure	No change	No change	Converted to generalized logistic regression	No change	Converted to generalized logistic regression
Outcome	Collapsed 3 categories ( $\leq 3$ days, 4 days; $\geq 5$ days) into binary response ( $< 5$ days; $\geq 5$ days)	Exchanged <i>high risk for discharge to facility</i> for target Los $\geq 5$ days Used threshold of 9 to be high risk category for $> 5$ day LoS	Binary outcome (discharge home; discharge facility) changed to binary response ( $< 5$ days; $\geq 5$ days)	Cutoff for high risk of extended LoS ( $\geq 5$ days) changed from 12 to 9.5	No change - binary response ( $\leq 3$ days; $> 3$ days)
Age	No change	Added $< 50$ category - allocated score of 3	Added $< 50$ category	No change	No change
Gender	No change	No change	No change	No change	No change
Joint	No change				
ASA rating	No change				
No. CV comorbidities	No change				
No. renal comorbidities	Changed from count to binary (yes; no)				
Current smoker	No change*				
Diabetes oral treatment	Changed to presence of diabetes (yes; no) but not oral treatment status				

Musculoskeletal comorbidities	No change				
Mobility/Walking distance		Added a category for <i>missing data</i> - allocated a score of 1	Added a category for <i>missing data</i>		
Gait aids		Collapsed responses into binary (yes; no); allocated scores of 2 to <i>no</i> and 1 to <i>yes</i>	Collapsed responses into binary (yes; no)		
Community support		Not available in current dataset	Not available in current dataset		
Caregiver availability		No change	No change		
Opioid usage				Changed to binary response (yes; no)	Changed to binary response (yes; no)
Preoperative METs				No change	Added a category for <i>missing data</i>
Neuraxial anaesthesia				Not included (not preoperative)	Not included (not preoperative)
Preoperative anemia status				No change	No change
COPD status				No change	No change
Hypertension				No change	No change
Obesity (BMI $\geq 30\text{kg/m}^2$ )				No change	No change

\* blank responses in free-text comorbidities field assumed to be absence of smoking
