Janssen Research & Development	The Clinical Practice Research Datalink (CPRD)	The Clinical Practice Research Datalink (CPRD) is a governmental, not-for-profit research service, jointly funded by the NHS National Institute for Health Research (NIHR) and the Medicines and Healthcare products Regulatory Agency (MHRA), a part of the Department of Health, United Kingdom (UK). CPRD consists of data collected from UK primary care for all ages. This includes conditions, observations, measurements, and procedures that the general practitioner is made aware of in addition to any prescriptions as prescribed by the general practitioner. In addition to primary care, there are also linked secondary care records for a small number of people. The major data elements contained within this database are outpatient prescriptions given by the general practitioner (coded with Multilex codes) and outpatient clinical, referral, immunization or test events that the general practitioner knows about (coded in Read or ICD10 or LOINC codes). The database also contains the patients' year of births and any date of deaths.	United Kingdom
IDIAPJGol	The Information System for Research in Primary Care (SIDIAP)	The Information System for Research in Primary Care (SIDIAP; <a href="http://www.sidiap.org">www.sidiap.org</a> ) is a primary care records database that covers approximately 80% of the population of Catalonia, North-East Spain. Healthcare is universal and tax-payer funded in the region, and primary care physicians are gatekeepers for all care and responsible for repeat prescriptions.	Spain
Stanford	Stanford Medicine Research Data Repository (STARR-OMOP)	A clinical data warehouse containing live Epic data from Stanford Health Care, the Stanford Children's Hospital, the University Healthcare Alliance and Packard Children's Health Alliance clinics. Reference: Datta S, Posada J, Olson G, <i>et al.</i> A new paradigm for accelerating clinical data science at Stanford Medicine. <i>arXiv</i> 2020; published online March 17. <a href="http://arxiv.org/abs/2003.10534">http://arxiv.org/abs/2003.10534</a> (accessed Aug 20, 2020).	United States
Columbia	Columbia University Irving Medical Center (CUIMC)	The clinical data warehouse of New York-Presbyterian Hospital/Columbia University Irving Medical Center, New York, NY, based on its current and previous electronic health record systems, with data spanning over 30 years and including over 6 million patients	United States
IQVIA	Open Claims	Pre-adjudicated claims covering over 300 Million lives (~80% of the US) collected from office-based physicians and specialists via office management software and clearinghouse switch sources for the purpose of reimbursement.	United States
Department of Veterans Affairs	V- OMOP	VA-OMOP data reflects the national Department of Veterans Affairs health care system, which is the largest integrated provider of medical and mental health services in the United States. Care is provided at 170 VA Medical Centers and 1,063 outpatient sites serving more than 9 million enrolled Veterans each year.	United States

## Appendix 2. Definitions and codes used to identify COVID-19 and seasonal influenza 2017-2018 cases

The below tables summarise the concepts used to identify patients diagnosed with COVID-19 and with season influenza during the 2017-2018 season. The full description of the logic used is provided at <https://atlas.ohdsi.org/#/cohortdefinition/200> for COVID-19 and at <https://atlas.ohdsi.org/#/cohortdefinition/211> for influenza. Similarly, the full description of the logic used to identify patients hospitalized is provided at <https://atlas.ohdsi.org/#/cohortdefinition/197> for COVID-19 and at <https://atlas.ohdsi.org/#/cohortdefinition/212> for influenza.
