

## Modeling the Coronavirus Disease 2019 Incubation Period: Impact on Quarantine Policy

Patients with starting date of exposure available (n=111)

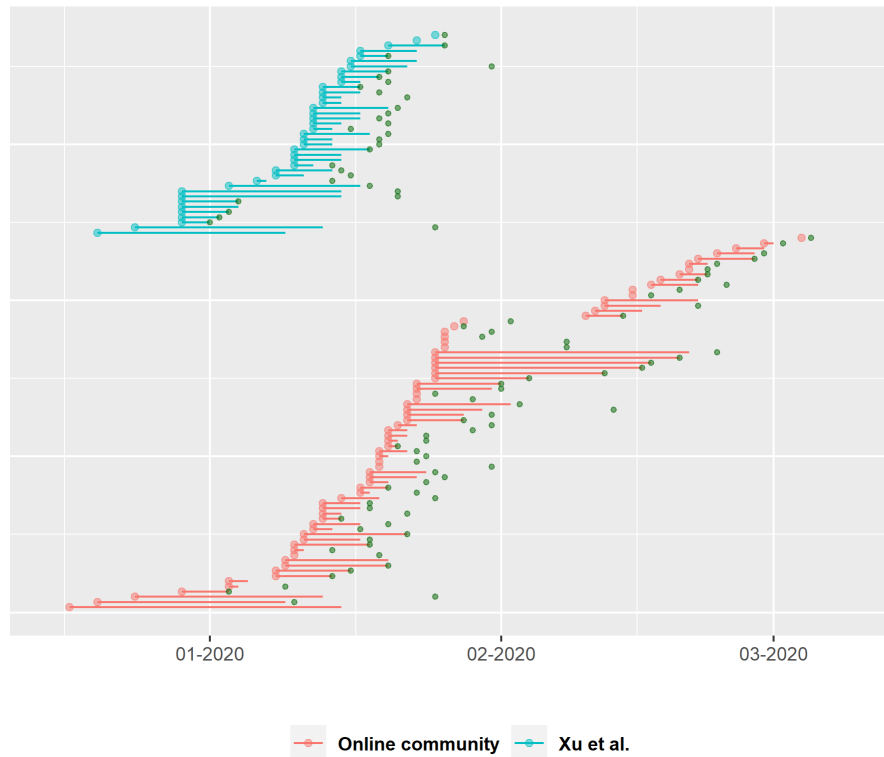

Figure S1. Segments represent the exposure period for online community from DXY [6] (red, n=69) and Xu et al [7] (blue, n=39). Dark green points represent the symptoms onset, when available.

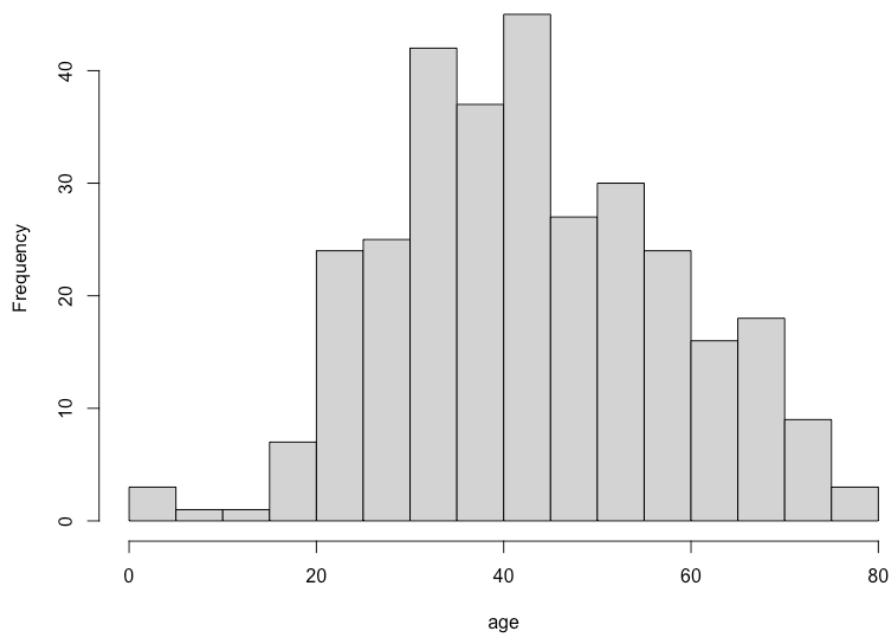

Figure S2. Histogram of patient's age

Table S1. Summary of patient's age

	Min	Q1	Median	Mean	Q3	Max
Overall	2	33	42	43.64	55	80
Male	10	34.12	43	43.99	55	80
Female	2	32	42	43.13	55	77

Table S2. Parameter estimation with age as a continuous variable

	$\log(\lambda)$	$\log(\phi)$	$\log(\rho)$	$\beta_{male}$	$\beta_{age}$
Estimate	0.917	0.604	-0.566	-0.569	-0.029
SE	0.314	0.219	0.751	0.336	0.011
P-value	0.003	0.006	0.451	0.091	0.007

Table S3. Estimated difference in the incubation period between two age groups (patients aged > 42 years – patients aged ≤42 years) at each percentile by changing the maximum exposure duration to 20 days (scenario I), and by shifting the lower bound for the starting date of exposure to December 15, 2019 (scenario II) and to November 15, 2019 (scenario III)

Scenario	Percentile				
	2.5 <sup>th</sup>	25 <sup>th</sup>	50 <sup>th</sup>	75 <sup>th</sup>	97.5 <sup>th</sup>
I	0.1 (0, 0.3)	0.7 (0, 1.4)	1.3 (0.0, 2.6)	2.2 (0.1, 4.3)	4.4 (0.1, 8.7)
II	0.1 (0, 0.3)	0.9 (0, 1.7)	1.7 (0.1, 3.2)	2.8 (0.2, 5.4)	5.8 (0.3, 11.2)
III	0.2 (0, 0.4)	1.0 (0.1, 1.8)	1.7 (0.2, 3.3)	2.9 (0.3, 5.4)	6.7 (0.6, 12.8)

Table S4. Summary of two datasets from DXY [6] and Xu et al [7]

Source*	Age	Gender		Total
		Female	Male	
DXY	≤42	40	56	96
	>42	25	42	67
Xu et al	≤42	42	69	111
	>42	30	42	72

\*Two sources have 34 duplicated cases (22 for age ≤42 and 12 for age >42).

Table S5. Parameter estimation from separate data sets

Source		$\log(\lambda)$	$\log(\phi)$	$\log(\rho)$	$\beta_{male}$	$\beta_{age\leq 42}$
DXY [6]	Estimate	1.773	0.624	-1.226	-0.325	0.630
	SE	0.179	0.173	0.884	0.296	0.306
	P-value	<0.001	<0.001	0.165	0.272	0.039
Xu et al [7]	Estimate	2.580	0.469	-2.173	0.400	0.370
	SE	0.158	0.123	1.169	0.263	0.265
	P-value	<0.001	<0.001	0.063	0.129	0.162
