

Section & Topic	No	Item	Reported in section/paragraph
TITLE OR ABSTRACT			
	1	Identification as a study of diagnostic accuracy using at least one measure of accuracy (such as sensitivity, specificity, predictive values, or AUC)	Title Abstract
ABSTRACT			
	2	Structured summary of study design, methods, results, and conclusions (for specific guidance, see STARD for Abstracts)	Due to the intended format of the article (letter/dispatch), the abstract had to be kept very concise (word count limit: 50). Thus, this information can be found in the sections "The Study" and "Conclusions" in the main text body
INTRODUCTION			
	3	Scientific and clinical background, including the intended use and clinical role of the index test	Main text body, paragraph 1
	4	Study objectives and hypotheses	Main text body, paragraph 2
METHODS			
<i>Study design</i>	5	Whether data collection was planned before the index test and reference standard were performed (prospective study) or after (retrospective study)	
<i>Participants</i>	6	Eligibility criteria	Section "The Study", paragraph 1; Appendix Table 1
	7	On what basis potentially eligible participants were identified (such as symptoms, results from previous tests, inclusion in registry)	
	8	Where and when potentially eligible participants were identified (setting, location and dates)	
	9	Whether participants formed a consecutive, random or convenience series	
<i>Test methods</i>	10a	Index tests, in sufficient detail to allow replication	Section "The Study", paragraph 1; Appendix Table 2
	10b	Reference standard, in sufficient detail to allow replication	not applicable
	11	Rationale for choosing the reference standard (if alternatives exist)	
	12a	Definition of and rationale for test positivity cut-offs or result categories of the index test, distinguishing pre-specified from exploratory	Section "The Study", paragraph 1, Appendix Table 2
	12b	Definition of and rationale for test positivity cut-offs or result categories of the reference standard, distinguishing pre-specified from exploratory	not applicable
	13a	Whether clinical information and reference standard results were available to the performers/readers of the index test	Section "The Study", paragraph 1
	13b	Whether clinical information and index test results were available to the assessors of the reference standard	not applicable
<i>Analysis</i>	14	Methods for estimating or comparing measures of diagnostic accuracy	Tables 1 and 2
	15	How indeterminate index test or reference standard results were handled	
	16	How missing data on the index test and reference standard were handled	
	17	Any analyses of variability in diagnostic accuracy, distinguishing pre-specified from exploratory	not applicable
	18	Intended sample size and how it was determined	

RESULTS			
<i>Participants</i>	19	Flow of participants, using a diagram	See S1 Flowchart
	20	Baseline demographic and clinical characteristics of participants	Appendix Table 1
	21a	Distribution of severity of disease in those with the target condition	not applicable
	21b	Distribution of alternative diagnoses in those without the target condition	
	22	Time interval and any clinical interventions between index test and reference standard	
<i>Test results</i>	23	Cross tabulation of the index test results (or their distribution) by the results of the reference standard	index test results: Figures 1 and 2, Tables 1 and 2 Appendix Figure 1
	24	Estimates of diagnostic accuracy and their precision (such as 95% confidence intervals)	Tables 1 and 2
	25	Any adverse events from performing the index test or the reference standard	not applicable
DISCUSSION			
	26	Study limitations, including sources of potential bias, statistical uncertainty, and generalisability	Section “The Study”, paragraph 2; section “Conclusions”, paragraph 2
	27	Implications for practice, including the intended use and clinical role of the index test	Section “Conclusions”, paragraph 1
OTHER INFORMATION			
	28	Registration number and name of registry	HREC (Human research Ethics Committee) registration numbers: Legend of appendix Table 1
	29	Where the full study protocol can be accessed	not applicable
	30	Sources of funding and other support; role of funders	Section “Funding”
